

Spectacular Vacation Home

This Long Bay, Tortola home which was built several years ago was in need of some "TLC".

The new owners, recognizing its spectacular location wanted to revitalize its look, whilst at the same time up-grade the doors and windows to current hurricane resistant standards.

Working with the General Contractor, Eurocarib provided Impact Rated Doors and Windows, replacing the old patio French Doors with much bigger sliding doors and insect screens, which fully retract to provide a large unobstructed door opening.

The increased door and window sizes now allow bright daylight to flood into the living space and make the most of the amazing view.

Working from the clients requirements, Eurocarib designed and installed the contemporary kitchen cabinetry which contains many innovative storage features and hidden accessories.

Construction of the feature counter top "Waterfall End" using Special Grade Corian provided a contemporary design feature whilst keeping the project costs within budget.
